

NEW BLADE MATERIAL 『ME-21』

FOR SLOT DIE

NEW ERA OF SLOT DIE BLADE

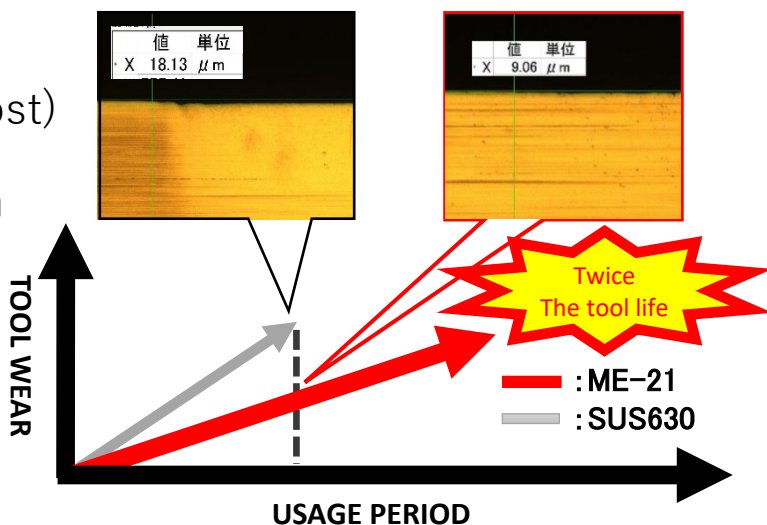

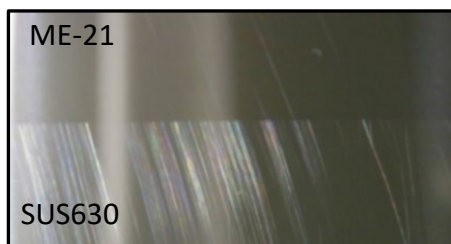

Specification of 『ME-21』

- Share the same level of corrosion resistance as SUS630
- While keeping the high corrosion resistance, ME-21 is 1.5 times harder than SUS630

Advantage of 『ME-21』

- Longer tool life (Able to reduce the running cost)
- Lower risk of cleaning scratch

- Unlike surface-coating die, corrosion resistance will not get worse rapidly all of sudden

※Test result of Company A (positive electrode)
Hardness of paste : Hv1000
Due to NDA, unable to give other details
